

With a sleek design: the NEO Slim series of writing instruments

Anyone who works a lot on their mobile phone and tablet also expects other tools such as writing instruments to be useful as well as user-friendly. When it comes to design, young professionals and trend-setters who keep pace with the times have specific expectations: they expect a sophisticated and modern look and a cool, smooth feel. This is where the new NEO Slim comes in as it meets these very needs: The three writing instruments in the series have an especially slim design and the barrel comes in either matt or polished stainless steel, in matt painted metal with black chromed tip, cap and clip or in black with rosé plating. The pen with its document-true cartridge or rollerball pen with its very fast-drying ink are perfect for those who want to put their ideas down on paper on the spur of the moment. And for all those who are preserving their love of traditional writing, we recommend filling in your agenda with the NEO Slim fountain pen. It comes in four nib widths: M, F, EF and B. All pens have a practical, spring-loaded clip which makes them the perfect companions!
